DOTATATE PET/CT PATIENT REFERRAL

Patient Details:

Surname: _____ First Name: _____ D.O.B: _____

Mobile: _____ Home: _____ Email: _____

Address: _____

Indication *– Please tick appropriate box

- Unfunded**
(No Medicare Item Number)
- MENINGIOMA - unfunded**
- PARAGANGLIOMA - unfunded**
- PHAECHROMOCYTOMA**
- unfunded

MBS Item No. 61647

- Whole Body 68Ga-DOTA- peptide PET study**
- CARCINOID Primary Site**

Description: Whole body 68Ga-DOTA-peptide PET study (including any associated computed tomography scans for anatomic localisation and attenuation correction), if:

- a. a gastro-entero-pancreatic neuroendocrine tumor is suspected on the basis of biochemical evidence with negative or equivocal conventional imaging; or
- b. both:
- a surgically amenable gastro-entero-pancreatic neuroendocrine tumour has been identified on the basis of conventional techniques; and
 - the study is for excluding additional disease sites (R)

Pre-PET Stage: T _____ N _____ M _____

Suspected/known metastases:	<input type="checkbox"/> Yes <input type="checkbox"/> No	Where:	
Histology/Biopsy:	<input type="checkbox"/> Yes <input type="checkbox"/> No	Where:	When:
Prior Relative Imaging:	<input type="checkbox"/> Yes <input type="checkbox"/> No	Where:	When:
Diabetic:	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Lutetium therapy	<input type="checkbox"/> Yes <input type="checkbox"/> No	Date:	_____
Last Somatostatin injection	Date:	_____	
(Recent treatment may interfere with interpretation)			

Clinical History: (e.g. recent infections, treatment or surgical findings) _____

Diagnostic Contrast CT will be undertaken routinely with this procedure

Please fax kidney function blood tests to 8382 1824

eGFR: _____ Creatinine: _____ Date: _____ Iodine Allergy: Yes No
